Subject: Net metering

Dear Commissioner:

It has become public knowledge that APS is attempting to change net metering to afford themselves more profit. As a solar user I resent APS's constant rate changing for their benefit. I went with solar to try and save money while benefiting the environment. I'm on a fixed income and cannot afford to have APS changing thing around. Somehow I always lose! I don't have a lobby or anyone else to speak for me so I ask you to please help the people of Arizona keep what little they have and not allow APS to change the net metering.

Thank you,
Arlene Jastrem

Subject: APS attack on solar

My name is Phil Hanus and I wanted to get your view on what is transpiring with APS and their idea to get rid of the net metering program. I believe Arizona is perfect for solar and that we should take advantage of all the sun light that we receiver per year. I myself was thinking about purchasing a solar system for my home, but the idea that the net metering plan will cease to exist worries me to hold off.

For me to purchase a solar system would help the local economy as I would be putting engineers, electricians, and other labor to work. Also I would be contributing to the local power grid. Without net metering it would not make economical sense for me to put forth a large sum of money for my own infrastructure costs that APS does not have to pay for and is benefiting from. I'm sure there are lots of taxpayers standing by waiting to see how this decision plays out. With so much uncertainty I am having to stand back and wait to see the outcome of the net metering policy. I urge you to vote to keep net metering going or at the very least allow new solar installers to claim net metering until they breakeven with their investment so at least Arizona will still go down the road of solar.

Thanks for your time,
Phil Hanus
